About Fundamental Analysis (Industry, Economics & Company Analysis)

This course helps you understand the most important parameters from the financial statements such as balance sheet, income statement and cash flow statement. A Fundamental Analyst tries interpreting financial ratios to analyze operating activities, investing activities, liquidity, solvency and profitability.

Get a broad understanding of interest rates, inflation and central banks and how they affect the market and the companies in focus. The skills learned in this course will help you determine a company's financial health.

Course Content

- ▶ Basics of Equity Fundamentals
- ▶ Industry & Economics Analysis
- ▶ Financial Research Analysis
- ▶ How to Identify Valuation Parameters
- ▶ Three Statement Analysis
- ▶ Evaluating Sector & Industry Structure – Top down vs. Bottom Up Understanding Competitive Advantage and how it affects companies
